Dear FCC Commissioner, Iam respectfully requesting that you dismiss the petition from the NAB 04-160. The NAB should try to catch up to the successful, satellite radio industry. It seems that when new and inventive technologies, are brought to market the larger industries go and hide behind their dollars and the Federal Government, while the FCC has it's place, it's place is not in optional pay-for-service radio. People who are on the go such as myself look for the traffic and weather that XM radio has provided. Please re-visit this idea of removing the instant traffic and weather, because the next thing you know, they will ask you to take away satellite radio altogether. Thanks for your time. Please do the right thing and leave satellite radio alone.
